RUF BRIQUETTE

СТБ 2055-2010

from oak wood shavings

We guarantee high quality products, real prices and good terms of cooperation!

One of the main advantages of briquettes:

High calorific value and economy;

The duration of Gorenje is higher than that of classic firewood;

Eco-friendly and harmless;

Low humidity;

Light ignition. If you use briquettes, you will not need additional efforts for ignition;

In the combustion process the fuel briquettes produce less carbon dioxide, smoke or spark; a Lower ash content is about 0.3%;

Convenient storage and transportation. Due to its compact size, briquettes are unlike firewood they can fit more in one place.

Type: RUF (Rectangular shape, with RUF imprint).

- Briquette size: 150x60x90 mm. (+/- 1.5%)
- Weight of one briquette: 0,8333 кг. (+/- 1.5%)
- Moisture: <8%
- Ash content: <4%
- Calorific value $\geq 18,0$ МДж/кг

One package contains 12 briquettes and weighs 10 kg.

- Briquettes are Packed in shrink wrap***
- Certificate***
- Export delivery***

The cost of briquettes depends on the market situation, today it is 100 euros per 1 ton on the terms of FCA Pinsk Brest region
